

**CROWNS - TEMPORARY OR PERMANENT**

---

- 1** Purchase Dentemp from a pharmacy.
- 2** Rinse mouth thoroughly with warm water.
- 3** Mix powder with water to make a paste with a consistency like toothpaste.
- 4** Line the inside of the crown with the paste and seat on the tooth, lightly biting it into place with a cotton roll. Make certain the crown is properly seated all the way down and does not interfere with the bite. Otherwise, reposition it or keep it out. Wipe off excess glue.
- 5** Wait an hour prior to eating on the tooth.
- 6** Contact the office to be seen as soon as possible.
